TECHNICAL WEB PRODUCTION | CONTENT OPERATIONS | SEO AND AI DISCOVERABILITY

SUMMARY

Technical web and content operations professional with 9+ years of experience across enterprise SaaS and healthcare. Translates stakeholder content and design requirements into published web experiences through CMS authoring, structured content, metadata, QA, and launch coordination. Hands-on experience with Sanity and Astro, Sitecore migrations, and WordPress content strategy, supported by an independent portfolio of discoverability and web production implementations.

PROFESSIONAL EXPERIENCE

COLLIBRA | Senior Web Production Analyst

January 2024 - May 2026

- Managed enterprise web publishing in Sanity and Astro, coordinating Marketing, Product, UX, and Engineering inputs from content request through QA and release.
- Authored the Product Innovations page in Sanity, aligned component presentation with supplied Figma designs, and coordinated stakeholder copy, imagery, publication dates, and launch readiness.
- Handled page metadata and internal linking; reviewed links, spacing, imagery, navigation, and footer presentation as part of launch QA.
- Supported the Sanity website rebuild through structured-content and component validation, including schema behavior, conditional fields, and GROQ-driven previews.
- Partnered with frontend Engineering to document CMS and component defects, validate fixes, and maintain consistent publishing and content governance practices.

BAYCARE HEALTH SYSTEM | Web Content Coordinator

August 2021 - January 2024

- Managed consumer-facing healthcare content in Sitecore, coordinating publishing requests with digital teams, communications, IT, and service-line stakeholders.
- Supported the Sitecore 9-to-10 migration through user acceptance testing, migrated-content review, component and template validation, and defect reporting.
- Reviewed metadata, links, imagery, content structure, and presentation; worked with developers to confirm corrections before production release.

PROFESSIONAL EXPERIENCE CONTINUED

AWARE SENIOR CARE | Web Content Manager / Strategist

September 2017 - May 2021

- Developed SEO-driven content strategy using customer personas, keyword research, Google Analytics, and SEMrush to identify content gaps and editorial priorities.
- Supported migration from Adobe Business Catalyst to WordPress, coordinating content organization, metadata, publishing, and implementation QA with development consultants.
- Coordinated an eight-person contributor group and editorial calendar, maintaining content quality, review cycles, and publication deadlines.

PRA HEALTH SCIENCES | Social Media and Community Manager

June 2017 - September 2017

- Coordinated clinical-trial content with Business Development and Early Development Clinics; administered nine social channels supporting patient-enrollment campaigns.

AWARE SENIOR CARE | Social Media Manager

April 2015 - June 2017

- Managed social publishing and community engagement for senior-care services and supported website content updates.

SELECTED PROJECT

AI SEARCH LAB | Independent web production and discoverability portfolio

- Built an Astro portfolio with Sanity-driven vehicle pages and schema-validated experiment publishing to demonstrate structured content delivery and explore AEO/GEO questions.
- Implemented shared metadata, canonical URLs, a generated sitemap, and WebSite/WebPage JSON-LD; added automated output checks documented across 27 generated HTML pages.
- Built static, build-time, and browser-rendered content examples with initial-HTML assertions to examine content availability before JavaScript execution.
- Fixed an optional-form attribution error and added regression checks for absent forms, decoded UTM values, and missing campaign parameters.
